

PERSON MODULE

Click New row, choose 1/3 columns. Add the PERSON module.

Add a person's name and title (photo optional)
Save and exit. You can clone the module to the other columns and then just change the information. To clone, click on the little box in the left corner of the module.

Remember to always label the module before Save and Exit.

Admin Label

Admin Label:

Image collection of rocks

This will change the label of the module in the builder for easy identification.

Tip If you want your person modules in a certain order for every device, create a new row for each line.
