In the past DIVI automatically added spacing but now they don't so you will have to **add spacing**.

Click on **the cog** (gear) on the green bar and open the row options.

Click design and then **spacing**. The next step is a little trial and error. I suggest starting by putting 15 in the Margin -top and bottom, and Padding – top and bottom.

Then click the green arrow to save.

Then **update** the page and preview it. You can increase or decrease the number of spaces you want.

Without spacing (default)
